

## **Biography**

Dr. Mohammed Aljuaid received his doctoral degree (2019) from Primary care and Public Health department at Imperial College London, studying the extent to which healthcare is person-centred care among the current perception of staff, patients and family members in healthcare settings in Saudi Arabia. He's also trying to spread "Person-Centred Care" concept among all healthcare stakeholders at different levels in his country and the Middle East region.

Dr. Aljuaid earned his MSc (2011) in Health Administration from the Faculty of Health Sciences, La Trobe University, Australia. He holds a BSc (2001) in Quantitative Methods from the Faculty of Administrative Sciences, King Saud University, Saudi Arabia. He trained (2012-2013) as researcher training with Professor Osman Galal, Coordinator of Community Health Sciences at UCLA in the United States.

Currently Dr. Aljuaid works as associate professor in Department of Health Administration, King Saud University. Previously he worked at the Ministry of Health in the Health Sciences College in Riyadh in SA as Teacher of Biostatistics. He is a Member of the WHO Collaborating Centre for Public Health Education and Training at Imperial College London.

Dr. Aljuaid has published many academic papers, mainly in relation to his doctoral thesis, in high-prestigious journals. He's participated as speaker in many international conferences such as ISQua and International Forum on Quality and Safety in Healthcare.
