Dr. Asmaa Abdullah Alyaemni , Professor of Health Administration

Dr. Alyaemni is a Professor of Health Administration at the Business College of King Saud University, where she has been a faculty member since 2010. She holds a PhD in Health Services Management from the Liverpool School of Tropical Medicine and a Master's in Healthcare Administration (MHA) from the Business Administration College at King Saud University.

Dr. Alyaemni specializes in healthcare policy and program evaluation, with a focus on assessing equity in healthcare. She has a keen interest in organizational behavior within healthcare organizations and quality improvement assessments in health services. Her research examines the impact of leadership on healthcare outcomes and the implementation of innovative practices in healthcare settings.

Throughout her career, Dr. Alyaemni has published over 20 peer-reviewed articles in leading journals and has presented her work at numerous national and international conferences. She has authored a book on organizational behavior and patient safety and contributed a chapter on healthcare financing and transformation in the Saudi healthcare system. Furthermore, she is an active member of the American College of Healthcare Executives and serves on the editorial board of the International System of Health Care journal.

In addition to her academic responsibilities, Dr. Alyaemni enjoys mentoring students and engaging with the community through health education initiatives. Outside of her professional work, her interests include hiking, tennis, bicycling, and exploring world attractions.Dr Asmaa Alyaemni
